

**KOREAEXPERT**

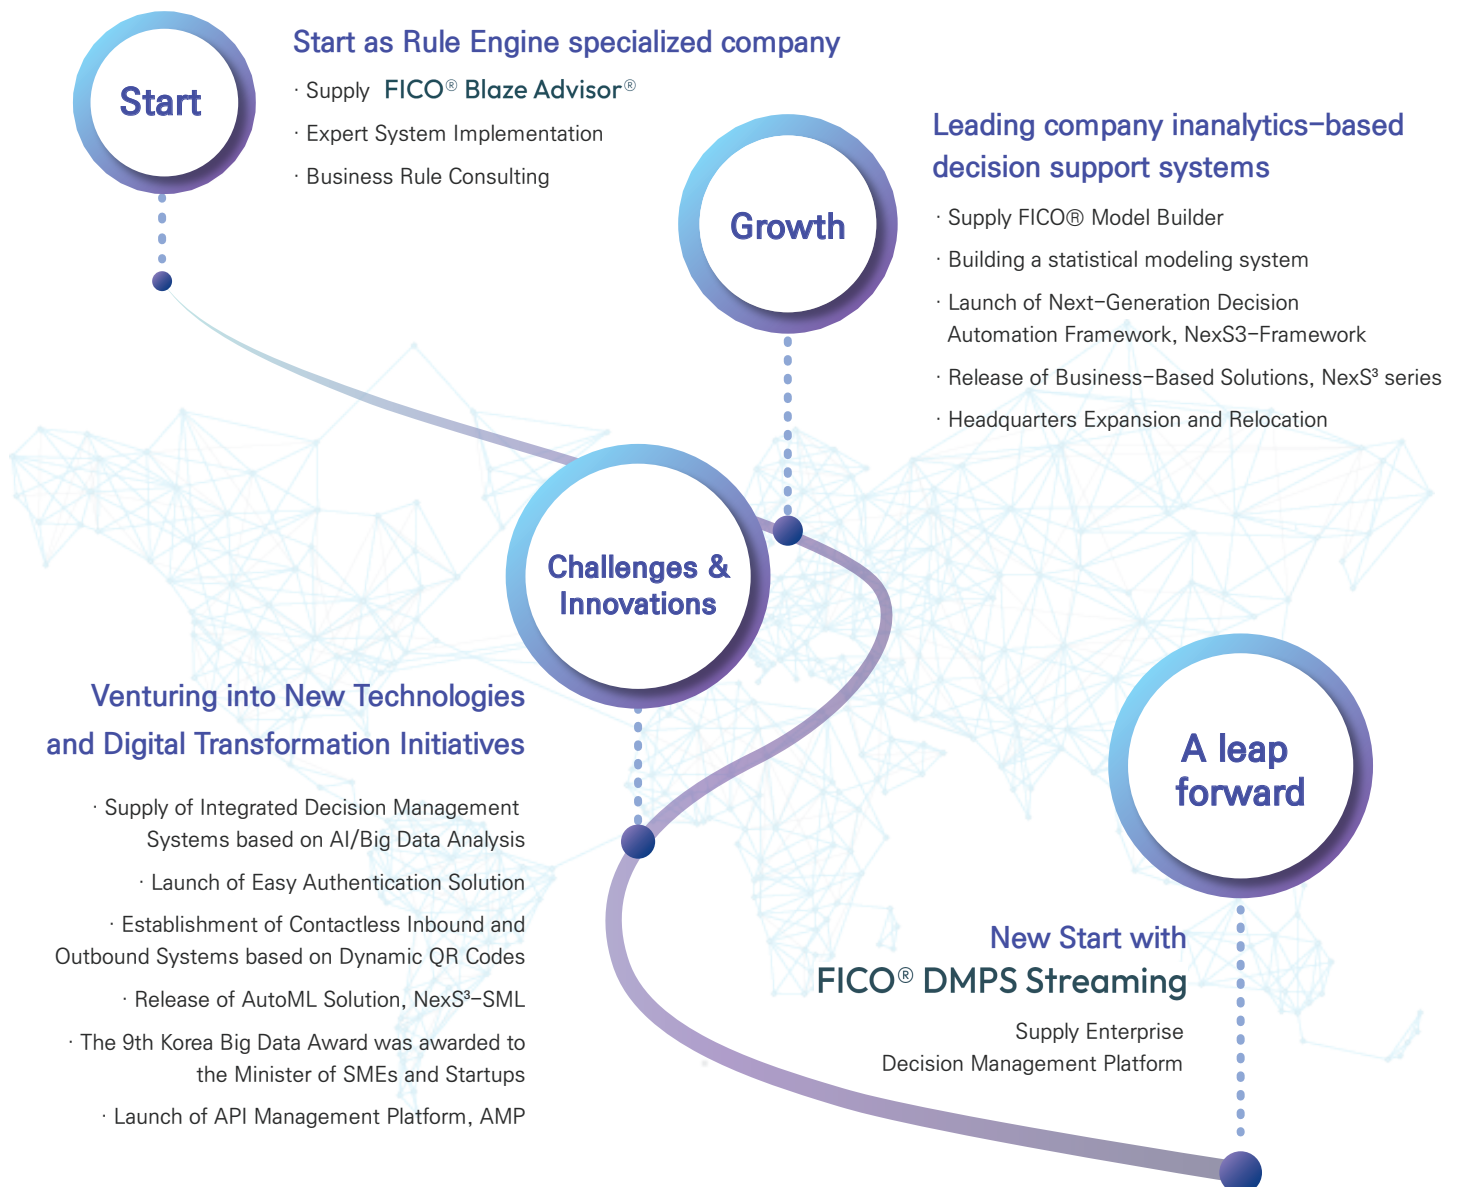

IT specialized company  
that enhances Business Value

# The First, The Best

## THE KE

**Korea Expert** started as the first rule engine specialized company in Korea, and has been committed to enhancing data analysis capabilities and providing own solution developments and services for building decision support systems based on big data analysis in various industries.

Based on our long-standing, proven technical expertise & know-how, and experience, we are focusing on new businesses encompassing security/authentication, cloud, and digital transformation(DT), aiming to evolve into an IT service expert group.

# GOOD DECISION made by Korea Expert

We have successfully executed projects across various domains including Consulting for Initial Data Acquisition, Data Analysis, Data Mart Construction, Development of Predictive Models, BI Viualization, AutoML Solution, Building a Big Data Analysis Platform, Rule Engine Solution, Supply Decision Automation System, Security Authentication Solution, API Gateway Solution, Integration onDigital Platforms etc.

## Bigdata

All about Data

### that enhances Business Value

We support the entire process of big data analysis, including all preparation processes for big data analysis, from consulting on how to accumulate data for customers who do not have data, to collect and build data marts, and visualize them with various tools.

## DT/DX

### Technical Partner for Leading Changes, Key Technologies for Digital Innovation

We provide information and technology for digital innovation based on our accumulated capabilities and expertise, including patented technologies OTID based authentication solutions, API Gateway integrated management solutions, and various cloud solutions.

## AI & ML

### Beyond Data, Business Insight! AI & ML on a different Level

We offer AI/ML services that go beyond data by providing business insights through data analysis, predictive model development, AutoML solution provisioning, and building big data platforms.

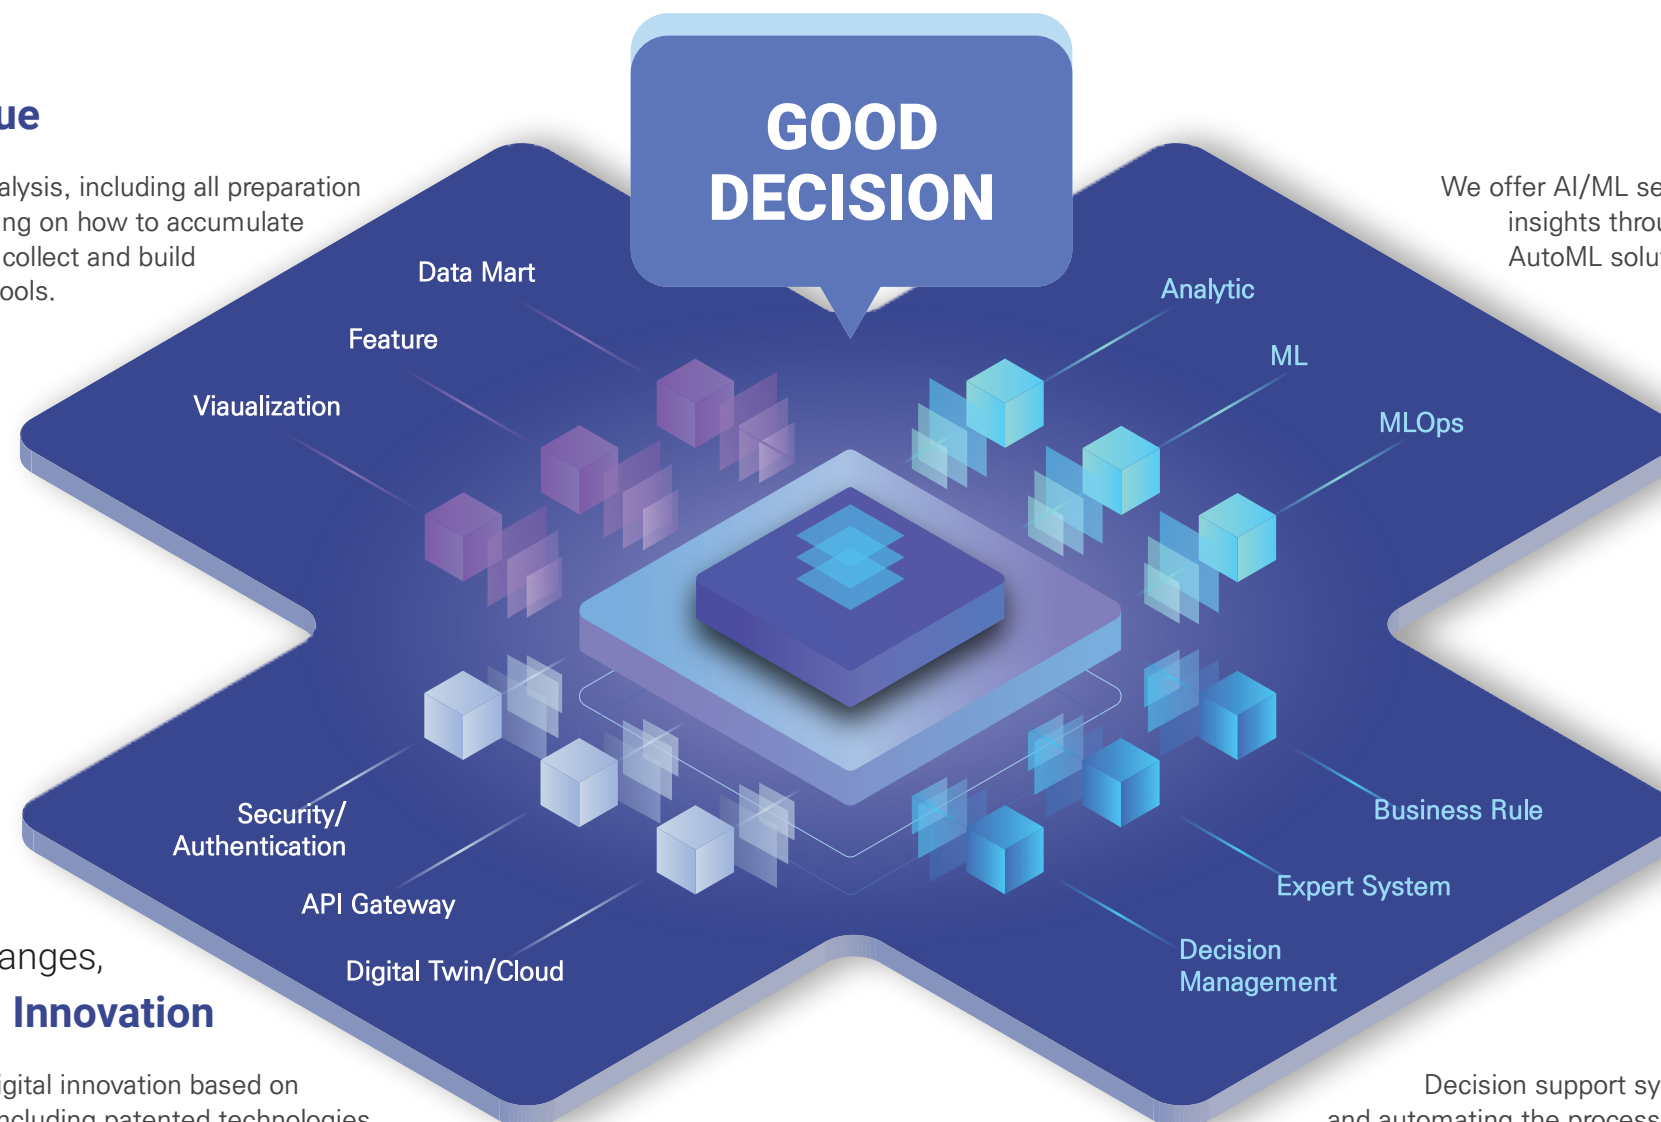

## Decisioning

### Business Rule, BRE, BRMS A to Z of Decision Automation

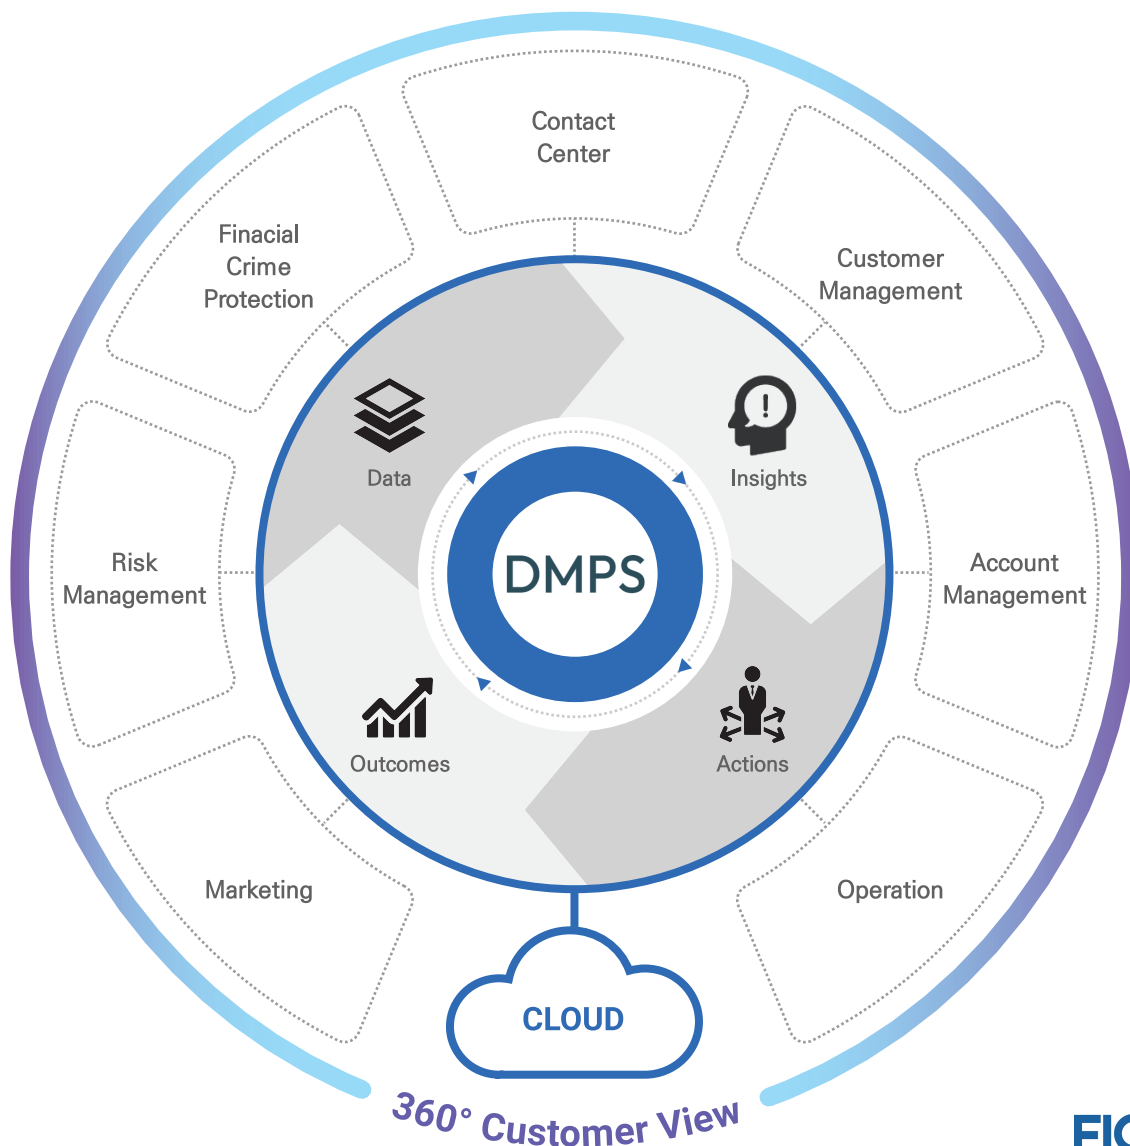

Decision support systems ultimately support better decision-making and automating the process based on various data sources and sophisticated analysis to optimize decision-making processes by incorporating experts' experiences, know-how, business logic, regulations, policies, and more.

FICO® DMPS Streaming FICO® Blaze Advisor®

Software Development Kit for Rapidly turn data into decisions

## Global No.1 Enterprise Decision Management Platform, DMPs

**FICO**

\*DMPS

Decision Management Platform Streaming

- Handle batch and streaming sources with a unified processing platform
- Turn data from raw to decision-ready in real time
- Make contextually-guided decisions with the flexibility to incorporate changing context
- Reduce the skill barrier with ease-of-use and robustness
- Deliver high performance, high scale processing without expensive hardware

## Key reference

### AI·Big data

Build Big Data Platforms,  
Supply of AutoML Solution,  
and Establishment of AI Training Data

### Security · Authentication · Integration

Supply Security·Authentication  
Solution, Build Integration  
Platform, and Cloud

### Fraud Detection System

Anomaly·Fraud Detection Scenario,  
Model Development Consulting,  
and System Implementation

### Expert Underwriting System

Establish of Insurance Disease·  
Application Assessment System  
Pre-Underwriting Process Consulting
